Prepared by the Trade Analysis Branch, Commercial Agriculture Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Joel L. Greene and Lilia E. George. Mrs. George also provides word processing and table formatting support. Editorial support is furnished by Martha R. Evans, Publications Services Branch, Information Services Division, Economic Research Service. Data processing support is provided by Kenneth King, Information Technology Services, Information Services Division.

Digest

U.S. Exports Rise in FY 1995 (see p. 2)--U.S. agricultural exports during October 1994-April 1995 totaled \$32.9 billion, 24 percent higher than a year earlier. Strong global demand for U.S. bulk and high-value products (HVP) has led to consecutive record exports each month in fiscal 1995. Bulk exports totaled \$15 billion, and HVP exports were \$17.9 billion.

Agricultural Imports Continue 12 Percent Higher (see p. 5)--U.S. agricultural imports for October 1994 to April 1995 continued to outpace last year's imports. Boosted by higher coffee and rubber import values, total import value rose 12 percent, or \$1.9 billion, to \$17.3 billion. Noncompetitive imports gained 49 percent over October-April last year and competitive import value was virtually unchanged. Imports from Latin America and Asia advanced, with Mexico, Brazil, and Indonesia the leading sources for agricultural commodities.

Export Share of U.S. Agricultural Production Unchanged in Fiscal 1994 (see p. 6)--The dollar share of U.S. agricultural production exported in fiscal 1994 held steady at 17 percent, the same as the previous year. By volume, the share of production for grains, (except wheat), many horticultural products, beef and poultry, and cotton increased. Soybeans, tobacco, and peanut export shares decreased.

Correction

The cotton data in table 5 of the FATUS March/April 1995 issue was incorrect. The corrected table with the fiscal 1994 data is printed on page 10 of this issue.

Notice

FATUS tables A-2 and B-3 are now available over the CALL-ERS/NASS electronic bulletin board. Set your communications software to 9600 (or lower) baud, N-8-1, and dial 1-800-821-6229 or 1-202-219-0377 to access the bulletin board. Log on as a new user and follow the instructions. The tables are self extracting archives which are decompressed by typing the file name at the command prompt.

U.S. Exports Rise in FY 1995

U.S. agricultural exports during October 1994-April 1995 totaled \$32.9 billion, 24 percent higher than a year earlier. Strong global demand for U.S. bulk and high-value products (HVP) has led to consecutive record exports each month in fiscal 1995. Bulk exports totaled \$15 billion, and HVP exports were \$17.9 billion.

The United States exported 77.2 million tons of bulk commodities through April, compared with 59.1 million tons a year earlier. The value of bulk exports rose 31 percent to \$15 billion. All major bulk commodities gained in value, but cotton and coarse grains provided most of the increase.

Cotton exports during October-April rose 75 percent to nearly 1.6 million tons, and export value jumped more than 118 percent to \$2.6 billion. The average cotton export price reached \$1,830 per ton in April 1995, the highest since 1981. Fiscal year-to-date U.S. cotton shipments to China were more than 400,000 tons, compared with 47,000 a year earlier.

U.S. coarse grain exports rose 47 percent to 36.7 million tons valued at \$3.9 billion because of strong corn shipments, which rose 56 percent to 32.6 million tons. U.S. corn exports advanced sharply after China withdrew from the corn export market. Japan was the leading market for U.S. corn, with imports of 9.2 million tons, but U.S. shipments gained the most to South Korea which usually purchased corn from China. U.S. exports to South Korea reached 5.1 million tons, compared with 108,000 tons a year earlier. Shipments to Mexico were 1.9 million tons, compared with 413,000 tons a year earlier, and exports to China reached 1.5 million tons.

Grain sorghum exports increased 4 percent to 3.4 million tons, but value declined 9 percent to \$356 million because of lower export prices. Both Japan and Mexico imported 1.4 million tons, but shipments to Mexico declined 23 percent as Mexico imported more U.S. corn. In addition, the United States shipped 238,000 tons of grain sorghum to Australia where last year's drought increased demand for imported feed grains.

U.S. exports of HVP commodities increased 19 percent to \$17.9 billion, led by rising fruit and vegetable, red meat and poultry meat, and

vegetable oil exports. U.S. HVP exports continue strong in fiscal 1995 as world income growth and a weaker dollar support import demand for U.S. food items.

Fruit (including juice) and vegetable exports expanded 22 percent to \$4.3 billion for the first 7 months of fiscal 1995. Fresh fruit exports rose 8 percent to \$1 billion. Much of the gain was to Japan, Korea, Hong Kong, and Taiwan, with total shipments to these countries rising 19 percent to almost \$460 million. Processed fruit and juice exports rose 22 percent to \$718 million due primarily to gains in orange, grapefruit, and apple juice exports.

Vegetable exports have been one of the strongest growing exports in 1995. U.S. exports rose 29 percent to \$2.6 billion through April. Fresh vegetable exports gained 29 percent to \$667 million, but volume only rose 16 percent as export prices were higher. Highly processed vegetable products rose 31 percent to \$1.2 billion. Canned and frozen vegetable exports gained 24 percent to \$421 million. U.S. vegetable exports to Canada increased 41 percent to \$944 million, and exports to Japan rose 37 percent to \$466 million.

Poultry meat exports rose 40 percent to \$1.1 billion. Russia remained the leading market for U.S. poultry meat with imports of 351,000 tons valued at \$280 million. Exports to Hong Kong increased 81 percent to \$222 million.

U.S. red meat exports increased 20 percent to \$2.4 billion. Beef exports rose 15 percent to \$1.4 billion and pork exports advanced 43 percent to \$422 million. U.S. beef shipments to Japan were 162,000 tons valued at \$855 million. The largest gain for U.S. beef was to South Korea where shipments rose 30 percent to 41,000 tons valued at \$149 million. U.S. pork exports expanded because of increases to Japan and Russia. Exports to Japan rose 35 percent to \$259 million and exports to Russia gained 70 percent to \$45 million.

U.S. vegetable oil exports jumped 93 percent to \$1.3 billion because of strong soybean oil shipments to China of \$333 million through April 1995. China imported 512,000 tons of U.S. soybean oil through April. Total U.S. soybean oil exports were \$646 million. Vegetable oil exports have also advanced on increased shipments of sunflower and corn oil. (*Joel Greene, Trade Analysis Branch, 202-219-0816*)

Agricultural Imports Continue 12 Percent Higher

U.S. agricultural imports for October 1994 to April 1995 continued to outpace last year's imports. Boosted by higher coffee and rubber import values, total import value rose 12 percent, or \$1.9 billion, to \$17.3 billion. Noncompetitive imports gained 49 percent over October-April last year and competitive import value was virtually unchanged. Imports from Latin America and Asia advanced, with Mexico, Brazil, and Indonesia the leading sources for agricultural commodities.

Noncompetitive Imports Lead Growth

Noncompetitive import value gained 49 percent to \$5 billion, compared with fiscal 1994's year-to-date value of \$3.4 billion. Although coffee import volume declined slightly during the period, tight supplies and forecasts for reduced harvests boosted import unit values. This drove the coffee import value up \$1.2 billion to \$2.1 billion, and accounted for over half the gain in total import value. Mexico was the largest source for coffee with 135,000 tons, just over half of total import volume. Brazil shipped 124,000 tons and Colombia 88,000 tons. Strong demand for rubber in industrial nations, and the lingering effects of last year's production shortfalls, boosted rubber import value by nearly \$350 million. Banana import value gained as U.S. consumption continued steady gains.

Competitive Commodity Imports

Competitive imports edged up 2 percent for a gain of \$268 million to \$12.3 billion over October-April last year. Vegetables, fresh fruits, and cattle continue to be the strongest growing import commodities. U.S. cattle imports rose as Mexico's cattle producers sold stocks in the face of high feed prices. Low Florida production of tomatoes and other vegetables created supply gaps

prompting increased imports. Peppers, cucumbers, and squash import value rose on increased quantity despite lower unit values. Fresh fruit imports gained 12 percent, with Chile the leader with large grape shipments. Melon and strawberry shipments from Mexico gained, and orange juice rose 50 percent in value.

Imports from Canada gained slightly to \$3.1 billion for the October-April period, but the mix of commodities shifted from grains, oilseeds, pork, and beef to feeds and fodders, vegetable oils, cattle, and hides. Canadian shipments of cattle were up because refurbishment and modernization of large Canadian packing plants has shifted slaughtering activities to U.S. plants which then re-export processed beef to Canada. Processed cocoa product imports surged 24 percent to \$130 million. Malt beverage shipments from Canada were down as the United States increased imports of beer from Mexico.

Unlike Canada, with almost steady import value, Mexico's shipments jumped 29 percent, reaching \$2.5 billion. Part of the increase is due to the effects of the peso devaluation which occurred in December and affected the January-April import numbers as goods from Mexico became relatively cheaper for U.S. importers. Coffee, cattle, tomatoes, other vegetables, malt beverages, and fruits, all contributed to the \$600 million jump in imports from Mexico.

With shipments valued at \$726 million, Indonesia was the third largest source of U.S. imports. Rubber accounted for 66 percent of the value of Indonesian shipments, the remainder consisting primarily of spices, cocoa, coffee, canned mushrooms, and tropical oils. *(Tom Capehart, Trade Analysis Branch, 202-219-1262)*

Export Share of U.S. Agricultural Production Unchanged in Fiscal 1994

The dollar share of U.S. agricultural production exported in fiscal 1994 held steady at 17 percent, the same as the previous year. By volume, the share of production for grains, (except wheat), many horticultural products, beef and poultry, and cotton increased. Soybeans, tobacco, and peanut export shares decreased.

The export share of production is a measure of the importance of trade to the agricultural sector. The higher the share of production exported, the more critical trade is to the supply and utilization of that commodity. The export share of production estimates the value or volume of agriculture's output which enters international trade as U.S. exports.

Agricultural output is shipped abroad in many forms. Some commodities are exported in relatively unprocessed form, others bear little resemblance to the original. The degree of processing influences the calculation of the export share of production since the value added from such processing occurs after the commodity leaves the farm.

Food and feed grains, oilseeds, cotton, and tobacco are considered to have minimal value-added and are referred to as "bulk commodities." All other commodities are "high-value products (HVP)" by nature of their greater unit value, relative to bulk commodities, and their larger value-added component.

The value of the export share of production for agricultural commodities is the total fiscal year customs value multiplied by .7 to eliminate value-added (transportation, grading, marketing, and storage) between the farmgate and the port. The value of production is total farm cash receipts by calendar year, which fits the production cycle better than fiscal years. The export share of production for all agricultural commodities is calculated by dividing the adjusted value of exports by total cash receipts from crops and livestock, including government payments from the previous calendar year. Export shares of production for bulk and HVP commodities are an estimate of the proportion of export value derived from bulk

commodities (grains, oilseeds, tobacco, and cotton) and HVP commodities (all other commodities, including animals and animal products, horticultural crops, and sugar).

In absolute terms, high-value products have garnered an increasing share of export value as exports of high-valued products have risen at least 10 percent the last 3 years. During the same period, bulk commodity export value fell as strong domestic demand and high prices limited exports. Bulk commodities' export share of production slipped to 31 percent in fiscal 1994 from 33 percent in fiscal 1993 due to low production resulting from floods in the Midwest.

The export share of production for individual commodities is based on volume and calculated by dividing the volume exported in the relevant production year by the volume exported in the following fiscal year (i.e. October 1993-September 1994 is fiscal 1994). The export figure is based on the fiscal year because it approximates the time during which most commodities produced in a given crop year are exported.

Production of grains and oilseeds fell in 1993 due to floods in the Midwest and very dry weather in the Southeast. Lower wheat production, combined with decreased exports in 1994, resulted in an export share for 1994 of 54 percent, compared with 56 percent the previous year. But production decreases for rice, corn, grain sorghum, and soybeans netted higher export shares of production for those commodities. The export share of production for corn, rice, and sorghum rose in 1994 as high world prices mitigated declines in exports.

Soybean production declined in 1993 due to flooding in major producing areas. Lower exports in fiscal 1994 reflected tight domestic supplies. The export share of production fell because other producers were able to supply the world market.

The largest export share gainer was cotton; fiscal 1994 exports rose in the face of slightly lower production for the corresponding crop year, pushing the export share of production from 32 to 45 percent. Production declines in Pakistan and China, combined with increased shipments to China, Indonesia, Hong Kong, and Brazil, boosted exports.

Sharply lower U.S. tobacco production, combined with available supplies from other producers, and strong domestic demand due to minimum domestic content requirements for U.S.-manufactured cigarettes, diminished the export share of tobacco leaf production.

Generally, the export share of horticultural crop production either increased slightly or was steady.

The apple export share of production increased as shipments to Asia and Latin America advanced. Lower almond production, accompanied by increased exports, pushed the export share up to 83 percent. *(Tom Capehart, Trade Analysis Branch, 202-219-1262)*

INDEX OF APPENDIX TABLES

Table	Exports	Page
A-1	U.S. agricultural exports: Quantity and value by commodity	A-2
A-2	U.S. agricultural exports: Quantity, value, and unit value by commodity and country, October-April 1993/94 and 1994/95, and April 1995	A-5
A-3	U.S. wheat exports: Quantity (1,000 MT) by destination, October- April 1993/94 and 1994/95	A-72
A-4	U.S. coarse grain exports: Quantity (1,000 MT) by destination, October-April 1993/94 and 1994/95	A-73
A-5	U.S. soybean exports: Quantity (1,000 MT) by destination, October-April 1993/94 and 1994/95	A-74
A-6	U.S. agricultural exports: Value (1,000 dol.) by destination, October-April 1993/94 and 1994/95	A-75

Imports

B-1	U.S. agricultural imports: Value (1,000 dol.) by country of origin, October-April 1993/94 and 1994/95, and April 1994 and 1995	B-1
B-2	U.S. agricultural imports: Quantity and value by commodity	B-2
B-3	U.S. agricultural imports: Quantity, value, and unit value by commodity and country, October-April 1993/94 and 1994/95, and April 1995	B-5

Prices

C-1	Foreign currency units per U.S. dollar	C-1
C-2	Domestic and foreign wheat prices	C-2
C-3	Corn, sorghum, rice, and cotton prices	C-2
C-4	U.S. and northern European soybean and product prices	C-3
C-5	U.S. import prices	C-3

SUMMARY OF REPORT AER-716

The 1995 Farm Bill

GATT and Budget Constraints Are Crucial Issues for Export Programs

June 1995

Contact: Karen Z. Ackerman, (202) 720-6829

Export programs assisted about 20 percent of U.S. agricultural exports in 1989-93—and their role for certain commodities was much higher. A central policy issue related to these programs is how best to support farm exports, and thereby farm income, in a time of lower price subsidies under the Uruguay Round Agreement of the General Agreement on Tariffs and Trade (GATT) and with the current U.S. budget restraints. These and other policy questions and options are described in ***Agricultural Export Programs: Background for 1995 Farm Legislation***, a new report from USDA's Economic Research Service.

Exports play an important role in the health of the U.S. farm sector and related activities. For example, more than half the U.S. wheat crop is shipped overseas, as well as nearly half the rice and cotton crops. The agricultural sector generated an \$18 billion trade surplus in 1993, helping to offset deficits in other areas.

After the U.S. share of world agricultural trade fell from a peak of almost 20 percent in 1981 to about 12 percent in 1986, the United States revised domestic support policies and increased export assistance. The tools used to boost farm exports include programs to help exporters compete in pricing, to help importers obtain credit needed to purchase U.S. commodities, to influence consumer tastes and preferences, and to provide U.S. farm products as food aid.

A number of program-specific issues are likely to have prominent positions in this year's debate in Congress over omnibus farm legislation. One such question is how best to implement the Export Enhancement Program (EEP), which was successful in bringing the European Union (EU) to negotiate reductions in export subsidies, now that such subsidies are capped. And with the recent increase in exports of high-value products (HVP's), policymakers will be studying the role of export programs in HVP markets.

Another issue is how credit guarantees will operate in an environment where a growing number of foreign private entities (rather than state monopolies) import goods. The effectiveness of market promotion and an appropriate government role in such assistance can be contentious. With lower surplus stocks in exporting countries and higher commodity prices, future food aid availabilities for needy countries are uncertain.

In the aftermath of the GATT Uruguay Round, a key question is how to change the means and targets of export assistance. How funds are spent depends on the time horizon in which benefits are to be realized. In the short run, price subsidies are the quickest way to bring about greater sales, especially in the face of continuing EU subsidies and other competitors' pricing practices. However, the GATT agreement limits the commodities eligible for export price subsidies and subsidy volumes and values. Similarly, credit guarantees may help importers with foreign exchange constraints.

To Order This Report...

Market promotion may be the best way to develop consumer tastes and preferences to benefit U.S. producers. Nonprice market promotion activities have been used for a wide variety of HVP's as well as bulk commodities. If food aid, the most costly short-term means to boost exports, is combined with other economic assistance and generates economic growth in recipient countries, then such aid may lead to greater long-term demand for U.S. commodities.

Flexibility in providing export assistance will be needed to help U.S. exporters make sales in increasingly liberalized import markets. The effects of export subsidies are influenced by market conditions; that is, their effectiveness is greater in slack markets and less when supplies are tight.

Further, credit guarantee programs alone cannot substitute for price subsidies because savings to the importer in interest costs under a credit guarantee program often are not sufficient to counter competitors' exports that are subsidized or monopoly-controlled.

Studies of market promotion effectiveness have shown significant increases in export revenues from promotion, but critics have voiced concerns about taxpayer dollars displacing funds for activities traditionally financed by the private sector.

The Farm Bill Backgrounders

The report on which this summary is based is one of a series of 12 "Background for 1995 Farm Legislation" publications by USDA's Economic Research Service.

Besides export programs, the topics covered by the reports are wheat, dairy, feed grains, oilseeds, cotton, rice, sugar, tobacco, honey, and marketing orders and promotion programs.

For ordering information, see the box on the front page of this summary.
